EMMANUEL ABOAJAH

Senior Backend Engineer | Laravel & Node.js | API & System Architecture

Lagos, Nigeria | aboajahemmanuel@gmail.com | +234 806 216 5573 | linkedin.com/in/aboajahemmanuel | github.com/manny-e3

PROFESSIONAL SUMMARY

Senior Backend Engineer with 6+ years of experience building scalable APIs, microservices, ERP-integrated platforms, and financial systems using Laravel, Node.js, TypeScript, MongoDB, and MySQL. Strong background in system modernization, DevOps automation, AI integration, and performance optimization across fintech, SaaS, and AI-driven platforms.

CORE SKILLS

Backend: Laravel, Node.js, TypeScript, Express.js, REST APIs, Microservices

Databases: MongoDB, MySQL, PostgreSQL, MSSQL, Redis, Query Optimization, Caching

DevOps: Docker, CI/CD, GitHub Actions, Deployment Automation

Security: JWT, OAuth2, RBAC, Secure API Design

Testing: Jest, Supertest, PHPUnit

AI & Automation: Gemini AI, Background Jobs, Workflow Automation

PROFESSIONAL EXPERIENCE

Travaiq — Backend Engineer

May 2024 – Present

- Built Laravel + MongoDB microservices for an AI-powered travel planning platform.
- Integrated Gemini AI for automated itinerary generation and destination insights.
- Designed scalable APIs with caching, queues, and performance monitoring.

Software Business Solutions Consulting (SBSC) — Backend Engineer

Apr 2022 – Mar 2024

- Developed Node.js and Laravel APIs handling 5,000+ daily financial transactions.
- Led migration from monolithic PHP to Node.js microservices.
- Improved API response times by ~40% through optimization and architecture improvements.

NASD OTC Market — Backend Developer

Oct 2019 – Apr 2022

- Built backend systems for capital market operations and reporting.
- Developed automated reporting APIs, saving 20+ hours monthly.
- Improved system reliability using service-oriented architecture.

KEY PROJECTS

Rhymes Platform — Author Publishing & ERP System

- Architected a multi-role publishing platform with book reviews, sales tracking, and royalty payouts.
- Integrated ERPREV ERP for automated inventory and sales synchronization.

Deployment Manager App — DevOps Automation

- Built CI/CD deployment system with multi-environment pipelines and rollback.
- Improved deployment reliability by ~60%.

Publishing House Workflow Automation — Laravel ERP Platform

Personal Project | PHP 8.x, Laravel, MySQL, RBAC, REST APIs

- Designed and built a full-cycle publishing operations platform covering author enquiries, contract management, invoicing, and project lifecycle tracking.
- Implemented electronic signature workflows for submission agreements and publishing contracts, with admin oversight for document tracking.
- Architected a service-layer pattern (ProjectService, ProspectService) to encapsulate complex business logic across multi-role workflows.
- Built dual dashboards for admins and authors, integrating payment gateway support, OTP security, audit logging, and configurable system settings.

OTHER PROJECTS

AI Travel Platform (Travaiq): Microservices, Gemini AI integration

Digital Lending System: Secure lending APIs with Stripe & PayPal

Denver Limo App: Booking, driver management, and payments backend

EDUCATION & CERTIFICATIONS

B.Sc. Entrepreneurship Studies — National Open University of Nigeria

Node.js Masterclass — Udemy (2023) | Financial Technology Fundamentals — Coursera (2022)
