PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years of experience building and shipping web applications end-to-end, with deep expertise in backend architecture. Skilled in Laravel, Node.js, TypeScript, and JavaScript, from database design and REST APIs to role-based dashboards and user-facing interfaces.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, HTML5, CSS3, Laravel Blade, Responsive Web Design, REST API Integration

Backend: Laravel (PHP 8.x), Node.js, Express.js, REST APIs, Microservices, Queues, Background Jobs

Databases: MySQL, PostgreSQL, MongoDB, MSSQL, Redis, Query Optimization, Caching

DevOps & Cloud: Docker, Deployment Automation, Git

Security: JWT, OAuth2, RBAC, OTP Authentication, Audit Logging, Secure API Design

PROFESSIONAL EXPERIENCE

Backend Engineer | Travaiq *May 2024 – Present*

- Build Laravel and MongoDB microservices powering an AI-driven travel planning web platform.
- Integrated Gemini AI to generate automated travel itineraries and destination insights for end users.
- Design scalable REST APIs consumed by the web client, using caching, queues, and performance monitoring.

Backend Engineer | Software Business Solutions Consulting (SBSC) *Apr 2022 – Mar 2024*

- Developed Node.js and Laravel APIs processing transactions daily.
- Built and maintained scalable backend services using Node.js and Laravel, supporting new product features and integrations.
- Optimized APIs and database queries, reducing response times

Backend Developer | NASD OTC Market *Oct 2019 – Apr 2022*

- Built backend systems supporting capital market operations and regulatory reporting.
- Developed automated reporting APIs that streamlined data extraction and reporting workflows.
- Improved system scalability and maintainability by implementing modular, service-oriented backend architecture.

KEY PROJECTS

Deployment Manager App – DevOps Automation | *Docker, CI/CD, GitHub Actions*

- Built a CI/CD deployment application with multi-environment pipelines and one-click rollback.
- Improved deployment reliability through automated build and deployment workflows.
- Automated application deployments across staging and production environments.
- Integrated GitHub Actions for continuous integration and delivery.

Rekovry – Financial Dispute Resolution Platform | React, TypeScript, Vite, REST APIs

- Built a financial dispute platform for managing claims, evidence, and recovery workflows.
- Developed a multi-step claim intake flow for capturing dispute and transaction details.
- Integrated Paystack and Flutterwave for filing fees and payment processing.

Rhymes Platform – Author Publishing and ERP System (Full Stack) | *Laravel, MySQL, ERPREV ERP*

- Architected a multi-role publishing platform with book reviews, sales tracking, and royalty payouts for authors and admins.
- Integrated ERPREV ERP to automate inventory and sales synchronization.

Publishing House Workflow Automation (Full Stack) | *PHP 8.x, Laravel, Blade, JavaScript, MySQL, RBAC, REST APIs*

- Designed and built, end-to-end, a publishing operations platform covering author enquiries, contracts, invoicing, and project lifecycle tracking.

EDUCATION AND CERTIFICATIONS

B.Sc. Entrepreneurship Studies – National Open University of Nigeria

Certifications: Node.js Masterclass – Udemy (2023) | Financial Technology Fundamentals – Coursera (2022)
